

RESUME

I'm WEB Developer AND Security Specialist.

ABOUT ME

Computer geek, in my free time I like to program, study everything new in the field of computer science, self-taught. In my free time, I am fond of searching for errors, or I write tools to do it more effectively, well, to get rewarded, or an interesting merch, I am just at the beginning of the path of comprehending nuika poska vulnerabilities, and so to briefly describe myself, I love studying, a very responsible, sociable good-natured, with black humor, I like to solve complex and interesting tasks, I adore linux, and free software...

PORTFOLIO

```
~/git/reconWTF(master) » bash reconwtf.sh -h
Usage: ./reconwtf.sh [options...] -d <domain> -m <company tld> -l <list.txt> -x <scope.txt>
-t <cookies> -f <config.conf> -u <dir out> -r -s -p -a -o -v -h
-d, --domain <domain> domain target 'example.com'
-m, --company <name> company name 'Tesla inc'
-x, --scope <scope.txt> list of domains in the visibility zone
-g, --config <config.conf> config file 'dir/config.conf'
-t, --cookie <cookie> cookie -c 'PHPSESSID=qweqweqwe'
-r, --recon-full full target exploration ( with the use of attacks )
-s, --subdomain-search only subdomain search, resolution, and subdomain capture
-p, --passive only passive methods that do not affect the target
-a, --active full intelligence with the use of attacks
-o, --osint minimal exploration with the use of OSINT
-v, --version reconWTF version
-h, --help help
```

ReconWTF

ReconWTF this tool is designed for bug hunters, the main task of reconWTF is to collect the most accessible information possible using the best tools, I developed this tool for myself since the algorithm of reconWTF is my testing methodology!
